

Traditional garden windows are in the shape of a lean-to which attaches to the home. Custom shapes such as hip ends or double pitches are also available. Since all sizes are completely custom, there are no standard designs or sizes that you must maintain. If you have an existing garden window which needs replaced and is a unique size, Solar Innovations, Inc. can produce a new unit to fit your exact specifications.

## Features:

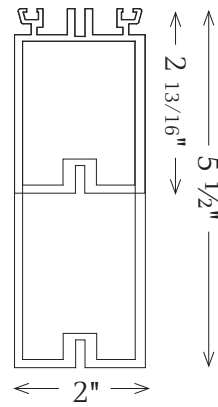

- Thermally enhanced aluminum profiles and sill members
- Overlapping construction creates positive drainage within profiles
- Glazing infills from 3/16" to 1 1/8"; thicker glass options depending upon engineering
- Standard finishes: AAMA 2603
