

SI5600 thermally enhanced “variable pitch” aluminum welded curb skylight system is designed for use in commercial and residential applications. The welded curb design provides a weather-tight, self-flashing curb for simplified installation onto a structural curb provided “by others”.

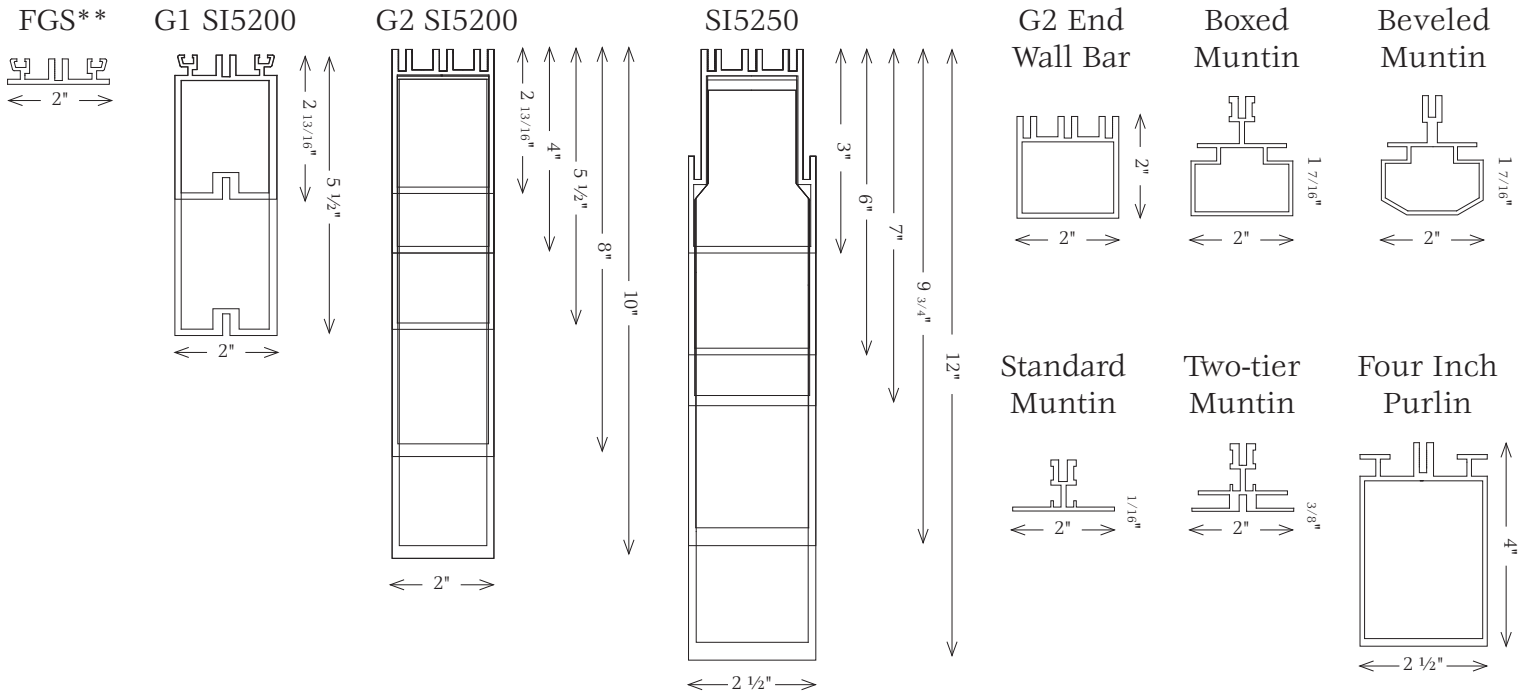

Features:

- Thermally-enhanced aluminum welded curb
- Self-flashing curb with fasteners on the vertical face, for added water protection
- Pre-assembled and pre-glazed up to 8' x 8' (pyramid), 8' x 12' (double pitches and hips); knocked down and modular options for larger skylights
- 2- or 3-tiered drainage system with concealed interior condensation gutters.
- Glazing infills from 3/16" to 1 1/2"; thicker glass options depending upon engineering
- Standard finishes: AAMA 2603
 - Duracron: Hartford Green, Bronze, Black, Natural Clay, White, Sandstone
- LEED friendly system including recycled content
- Designed and manufactured in the U.S.A.

Options:

- Aluminum or wood rafters and purlins
- Custom finishes
 - Class I anodized: Dark Bronze, Clear
 - Powder coat finish: AAMA 2604-2605
 - Fluoropolymer (50% or 70%): AAMA 2604-2605
 - Cladding options
- Operable and retractable venting options
- Condensation gutters available
- Designed to accommodate almost any monolithic, insulated, laminated, decorative, polycarbonate, or solid panel infill
- Delivery options: modular; pre-assembled, pre-glazed; pre-assembled, not pre-glazed; knocked down

* Tested configurations

Condensation Gutter Options

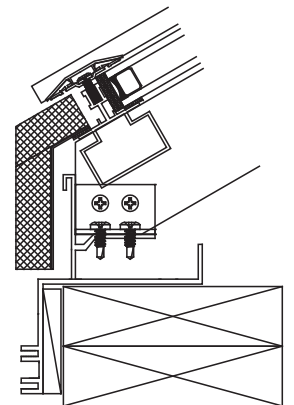

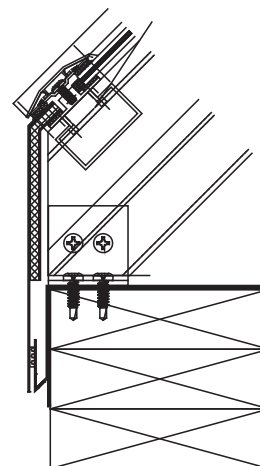

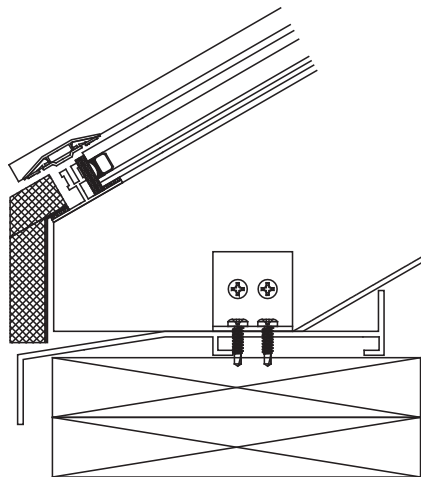

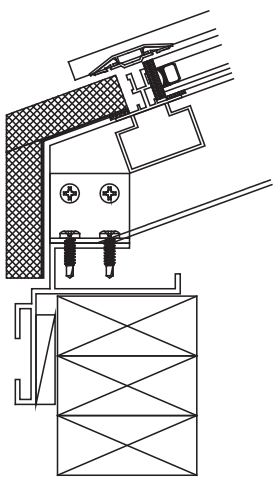

Standard Curb Mount Sill

Extruded HD Curb Mount Sill

Pan Flashing Sill

G3 Variable Pitch Welded Curb Sill

* Clip location and size dependent on final engineering. Clips are shown for reference only.

* Welded curb can accept 4" maximum rafter depth.

** 2 1/2" and 3" FGS are possible

Testing and performance results may vary depending upon sill and configuration selections.
